Tokyopop, announced at AnimeExpo.

No release date yet set, if I were to guess, I'd say summer 2007.

Blu has it. It's been renamed as "Love Pistols" and volume 1 is due out in December, I think.

Close, blumanga.com lists it as Jan 2007.

I have no problem answering the questions about if something is licensed, since I tend to track the industry.

And on that note, I will be VERY curious to hear what CPM/BeBeautiful has to say at their panel about their titles...
